Hospital, İstanbul

DEPARTMENT
Cardiology Department

CLINICAL FOCUS

A central part of Dr. Kanal's work is the assessment and treatment of coronary artery disease and ischemic heart disease, conditions in which narrowing of the coronary arteries, often related to atherosclerosis, limits blood flow to the heart muscle.

Dr. Kanal also manages heart failure, in which the heart is unable to pump blood effectively, and heart valve disease, which involves valves that do not open or close properly. Her practice further includes the evaluation and treatment of hypertension and hypotension, as well as arrhythmias, which are disturbances of the heart's rhythm.
