CLINICAL FOCUS

Dr. Özcan's diagnostic work includes mammography and the assessment of breast diseases, magnetic resonance imaging (MRI), computed tomography (CT), ultrasound imaging and scintigraphy. She also reports advanced CT-based examinations such as multidetector CT colonography, virtual colonoscopy and virtual angiography, which allow the bowel...

In interventional radiology and interventional neuroradiology, Dr. Özcan performs image-guided procedures, including transarterial radioembolization (TARE). Whether an interventional approach is appropriate is decided case by case after reviewing the patient's imaging, prior treatments and general condition, and in discussion with the...
