CLINICAL FOCUS

The core of Dr. Özcan's work is the assessment of patients who present with acute or sudden symptoms. Emergency patient assessment involves taking a focused history, examining the patient, and forming an early judgment about how urgent the situation is and what should happen next.

Her practice also covers urgent care and acute clinical care, meaning the management of patients whose condition requires prompt medical attention rather than a scheduled outpatient visit. The exact steps taken depend on the individual patient, the findings at presentation, and the results of any tests performed in the emergency service.

Acute clinical care

INTERNATIONAL PATIENTS

Dr. Özcan speaks Turkish and English, and interpreters can be arranged for patients who need support in other languages. The international patient team coordinates the collection of prior medical reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital visit.
