CLINICAL FOCUS

Dr. Ün's clinical work is focused on the evaluation and management of patients who arrive with urgent health concerns. In the Emergency Service, his role is to assess each patient's presenting complaint, take a history, carry out a clinical examination and decide on the next steps in care. The emphasis is on timely evaluation so that patients receive appropriate medical attention according to their condition.

Because emergency care covers a wide range of presentations, the assessment is tailored to the individual patient rather than to a single condition or procedure. Dr. Ün supports the evaluation and management of patients within the Emergency Service, drawing on his experience across several hospital emergency departments.

INTERNATIONAL PATIENTS

Dr. Ün consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. For international patients, the Acibadem international patient team coordinates the collection of prior reports and imaging, for example MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments...
