DEPARTMENT
Bariatric & Metabolic
Surgery

CLINICAL FOCUS

In endocrine surgery, Dr. Almali's work includes thyroid surgery. In the abdominal wall, he performs umbilical hernia repair and inguinal hernia repair. His digestive system practice includes reflux surgery, the management of cholecystitis (inflammation of the gallbladder), and other digestive system surgery.

Within the Bariatric & Metabolic Surgery unit, he offers obesity surgery. Whether a surgical approach is appropriate depends on the individual assessment of each patient, including their medical history and the treatments they have already tried. His practice further includes gynecomastia surgery and mastectomy.

Hemorrhoid and Anorectal Disease Treatment

Gynecomastia Surgery

INTERNATIONAL PATIENTS

Dr. Almali consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, for example ultrasound, CT or MRI reports, laboratory and pathology results, operative notes, and discharge summaries, so that relevant information is...
