CLINICAL FOCUS

Thyroid disorders are the main focus of Dr. Yetim's practice. He assesses and treats thyroid diseases in adults. Because thyroid conditions can present with varied and sometimes non-specific symptoms, assessment generally begins with a review of the patient's history, previous laboratory results and any imaging already performed,...

Metabolic and chronic conditions form a further part of his work. He follows patients with type 2 diabetes, obesity and other metabolic disorders, as well as anaemia, oedema and chronic diseases that require ongoing monitoring and adjustment of treatment.
