FOCUS
Diagnosis and treatment of childhood...

HOSPITAL
Acibadem Eskisehir Hospital

DEPARTMENT
Pediatrics

CLINICAL FOCUS

A large part of Dr. Özbay's practice involves infectious diseases in children. This includes the assessment and treatment of upper respiratory tract infections, which are among the most frequent reasons families seek pediatric care, as well as rubella and other childhood infections.

Dr. Özbay also follows newborns and infants in the first months of life. Newborn follow-up includes monitoring growth, feeding, and early development, and answering parents' questions about common concerns such as infant colic.

Upper respiratory tract infections in children

Infant colic

Newborn follow-up

INTERNATIONAL PATIENTS

Dr. Özbay speaks Turkish and English, and interpreters can be arranged for families who prefer another language. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as laboratory results, growth and vaccination records, ultrasound or X-ray reports, and discharge summaries,...
