CLINICAL FOCUS

Dr. Tarhan's work centers on diagnostic imaging in four broad fields. In oncologic radiology, she interprets imaging studies used in the assessment of cancer-related conditions; her publication record includes work on prostate cancer imaging and imaging in gynecological cancers.

Her genitourinary radiology and abdominal radiology practice covers imaging of the urinary tract, the reproductive organs and the abdominal organs, including the pancreas. Across these areas she works with computed tomography as well as magnetic resonance imaging.
