CLINICAL FOCUS

A central part of Dr. Tunçay's work is multidetector CT colonography, also referred to as virtual colonoscopy. This is a computed tomography examination in which cross-sectional images of the abdomen are acquired and reconstructed to allow the radiologist to review the large bowel. Dr.

Dr. Tunçay also has a clinical interest in breast diseases. In this area, her role is to assess breast imaging and to describe the findings in a structured report that supports further clinical decision-making. Imaging is one element of a broader assessment, and its interpretation depends on the clinical context provided by the referring physician and on any previous imaging...

INTERNATIONAL PATIENTS

Dr. Tunçay speaks Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge...
