DEPARTMENT
Gastroenterology

CLINICAL FOCUS

Endoscopy is a central part of Dr. Kutsal's practice. Endoscopic examination allows the digestive tract to be inspected directly and, where appropriate, tissue samples to be taken. It is used both to investigate symptoms and to follow up known conditions.

Dr. Kutsal also sees patients with obesity from a gastroenterology perspective, as well as patients with pelvic pain and functional gastrointestinal disorders. Functional disorders are conditions in which symptoms such as pain, bloating or altered bowel habit occur without a structural abnormality being identified on standard tests.
