CLINICAL FOCUS

A significant part of Dr. Dönmez's practice involves inflammatory skin diseases. She evaluates and treats acne, atopic dermatitis, contact dermatitis, and seborrheic dermatitis. These conditions can vary considerably from one patient to another, and management is typically adjusted to the pattern, severity, and duration of symptoms, as well as to any triggers identified during the consultation.

In the area of venereology, Dr. Dönmez manages sexually transmitted diseases, including genital herpes and genital warts, and she also treats warts on other parts of the body. Consultations for these concerns are conducted with attention to patient privacy and include a discussion of the diagnosis, the available treatment approaches, and follow-up.

Sunburn

Sun allergy

Genital herpes

Sexually transmitted diseases

Botulinum toxin applications

INTERNATIONAL PATIENTS

Dr. Dönmez consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports, such as previous dermatology notes, laboratory and pathology results, and any relevant imaging, and arranges appointments and the hospital visit.
