Hospital, İstanbul

DEPARTMENT

Orthopedics & Joint Center

CLINICAL FOCUS

Dr. Ziroğlu's clinical work centers on shoulder and elbow surgery, sports traumatology, and knee and joint injuries, including meniscus tears and cruciate ligament ruptures. Patients with shoulder or elbow problems may be evaluated for elbow surgery or other treatment options depending on the findings.

His practice also covers foot and ankle surgery and minimally invasive trauma surgery. Whether a surgical or non-surgical approach is appropriate depends on the individual diagnosis, imaging findings and the patient's overall health, and this is discussed with each patient after a clinical assessment.

Shoulder and elbow surgery
