CLINICAL FOCUS

Dr. Kisomi's work centers on emergency care and urgent medical evaluation. When a patient presents to the Emergency Service, she takes a focused history, performs a clinical examination and decides which investigations are needed to clarify the cause of the symptoms.

Her practice also includes initial emergency treatment. This may involve measures to manage pain, relieve symptoms or address an acute condition in its early phase, followed by monitoring of the patient's response. Depending on the findings, patients may be treated and discharged with instructions for follow-up, kept under observation, or referred to a specialist team within the hospital for further diagnosis and treatment.

INTERNATIONAL PATIENTS

Dr. Kisomi consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. For planned visits, the Acibadem international patient team coordinates the collection of prior medical reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments...
