DEPARTMENT
Dental & Oral Health

CLINICAL FOCUS

The central area of Dr. Çelebioğlu's practice is orthodontic care. This begins with a dental alignment assessment, in which the position of the teeth, the relationship between the upper and lower jaws and the way the teeth meet are examined.

On the basis of this assessment, she prepares an orthodontic treatment plan. The plan is tailored to the individual patient's alignment needs and takes into account the stage of dental development, previous dental or orthodontic treatment and the patient's own priorities.
