Acibadem Maslak Hospital,
İstanbul

DEPARTMENT
Radiation Oncology

CLINICAL FOCUS

Dr. Beşe's work centers on radiation therapy as part of cancer care. Radiation therapy may be considered on its own or alongside other treatments, depending on the type and stage of the cancer, the patient's general health and the recommendations of the wider oncology team.

A particular area of interest is breast cancer. Radiation therapy is one of several treatment approaches that may be discussed for patients with breast cancer, and the decision to use it, its timing and its extent are individualized after a review of the pathology, imaging and previous treatments. Dr.
