CLINICAL FOCUS

Dr. Atilla evaluates and treats patients with multiple sclerosis and myasthenia gravis, conditions in which diagnosis, the choice of treatment and follow-up over time are closely linked. She also manages epilepsy and essential tremor, and assesses patients with vertigo and balance disorders in order to identify possible neurological causes and plan appropriate care.

Headache management is a further area of her practice. Dr. Atilla treats migraine, including advanced migraine treatments and nerve blocks where these are considered suitable, and works with patients on stroke prevention by addressing risk factors and preventive treatment. In the field of cognitive and movement disorders, she assesses and follows patients with dementia, Alzheimer's disease and Parkinson's disease.

INTERNATIONAL PATIENTS

Dr. Atilla consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as MRI or CT reports, laboratory results, previous neurology reports and discharge summaries, and arranges appointments and the hospital visit.
