Otorhinolaryngology (ENT)

CLINICAL FOCUS

A significant part of Dr. Göğebakan's practice involves patients who present with vertigo and dizziness. These symptoms can have a range of causes, some of which are related to the inner ear, and evaluation typically involves a careful history, a clinical examination, and a review of any prior test results before a diagnosis is discussed.

Her nasal and throat work includes the evaluation and treatment of sinusitis, which may be managed medically or, in selected cases, surgically depending on the findings. Dr. Göğebakan also treats adenoid conditions and performs tonsil surgery.

Vertigo Dizziness Sinusitis Tinnitus Adenoid conditions

INTERNATIONAL PATIENTS

Dr. Göğebakan consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior medical reports and imaging, arranges appointments, and organizes the hospital visit.
