HOSPITAL
Acibadem Kozyatagi Hospital, İstanbul

DEPARTMENT
Treatment of Respiratory

CLINICAL FOCUS

Nursev Hazar's clinical work centers on respiratory rehabilitation and chest disease rehabilitation. Rehabilitation in this field is generally planned around the individual patient's condition, symptoms and existing treatment, with the aim of supporting breathing function and day-to-day activity within the limits set by the underlying disease.

She also works in physical rehabilitation, which may be combined with respiratory rehabilitation where a patient's overall condition requires it. Related services offered at the hospital include the Physical Therapy Program and Robotic Rehabilitation.

Respiratory rehabilitation

Chest disease rehabilitation

Physical rehabilitation

INTERNATIONAL PATIENTS

Nursev Hazar consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before the visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as chest X-ray or CT reports, laboratory results, operative notes and discharge summaries, and arranges appointments and the hospital visit itself.
