CLINICAL FOCUS

Dr. İsbir's clinical work centers on anesthesiology and reanimation. In pain management, his approach begins with a review of the patient's history, previous treatments, and existing imaging before any option is discussed. His expertise also extends to intensive care treatment and advanced life support for critically ill patients, as well as palliative care, which is directed at relieving symptoms and supporting comfort in patients with serious illness. The suitability of any treatment is assessed on an individual basis after clinical evaluation.
