CLINICAL FOCUS

Dr. Yılmaz's areas of expertise reflect the range of urgent situations seen in an emergency department, particularly in a coastal setting. He assesses and manages patients presenting after trauma, where the initial priority is a structured evaluation of injuries and the patient's overall condition.

A further part of his practice involves drowning emergencies, acute hypoxia and airway obstruction emergencies. In these situations, breathing and oxygenation are evaluated urgently and the patient is monitored closely while the cause is identified and addressed.

Acute hypoxia

INTERNATIONAL PATIENTS

Dr. Yılmaz consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. The Acibadem international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital visit.
