HOSPITAL
Acibadem Taksim Hospital, İstanbul

DEPARTMENT
Neurosurgery

CLINICAL FOCUS

A central part of Dr. Öztürk's work is the treatment of movement disorders, including Parkinson's disease, essential tremor, dystonic tremor and spasticity. Brain stimulation procedures form part of this area of practice. He also treats pituitary disorders and brain tumours, and his expertise includes brain haemorrhage and hydrocephalus.

His surgical practice further covers epilepsy surgery and spine surgery. Whether a surgical option is suitable depends on the individual diagnosis, previous treatments and overall clinical picture, which are assessed before any recommendation is made.
