DEPARTMENT
Neurosurgery

CLINICAL FOCUS

A large part of Dr. Yaman's practice is dedicated to the spine and spinal cord. He evaluates and treats spinal and spinal cord injuries, spinal deformities such as kyphosis and scoliosis, and spinal fractures. For selected vertebral fractures, minimally invasive cement-augmentation procedures such as kyphoplasty and vertebroplasty may be considered.

Beyond the spine, Dr. Yaman is involved in the treatment of movement disorders, including deep brain stimulation, a surgical approach in which electrodes are placed in defined brain regions and connected to a stimulator. Candidacy for this treatment is assessed on a case-by-case basis.

Spinal and spinal cord injuries

Spinal deformities and fractures

Kyphosis

Scoliosis

Kyphoplasty

INTERNATIONAL PATIENTS

Dr. Yaman consults in Turkish and English, and interpreters can be arranged for other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, for example MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital visit.

CONDITIONS TREATED

Spinal and spinal cord injuries

Kyphosis

Scoliosis

Spinal and spinal cord tumors

Spinal canal stenosis

EDUCATION & TRAINING
