CLINICAL FOCUS

Dr. Çınar's clinical work covers emergency medicine, emergency assessment and urgent medical care. In an emergency department setting this includes the initial evaluation of patients who present with acute symptoms, prioritizing care according to clinical urgency, and deciding whether further diagnostic tests, hospital admission or...

His published research reflects several areas of emergency practice. He has co-authored studies on pain management in the emergency department, including trends in the treatment of abdominal pain, the influence of patient anxiety on pain management, and analgesia in geriatric patients.
