CLINICAL FOCUS

A substantial part of Dr. Bairamov's work is in cosmetic dermatology. He performs botulinum toxin applications and dermal filler applications, and he uses fractional laser treatment and carbon peeling in the management of skin texture and appearance. His procedural work also includes the treatment of visible small blood vessels in the skin.

Alongside cosmetic work, Dr. Bairamov sees patients with sexually transmitted diseases. This includes the evaluation and treatment of genital warts, an area in which his training in dermatology and venereal diseases is directly relevant. Consultations in this area typically involve a discussion of symptoms and history, a clinical examination, and a review of the treatment options that may be appropriate for the individual...

Botulinum toxin applications

Sexually transmitted diseases

Fractional laser treatment

Carbon peeling

Small blood vessel treatment

INTERNATIONAL PATIENTS

Dr. Bairamov consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and any relevant imaging, arranges appointments, and organises the hospital visit.
