CLINICAL FOCUS

Dr. Buturak's clinical work is focused on breast diseases and the imaging methods used to evaluate them. Mammography is a central part of this work, and she has published on a self-compression technique intended to improve the patient experience during the examination.

Ultrasound imaging is also within her area of expertise and is often used alongside mammography or MRI to assess breast findings. In each case, the choice of imaging method depends on the clinical question, the patient's history and any previous examinations, and the radiologist's report is intended to support the referring physician in...
