CLINICAL FOCUS

Dr. Pinar's areas of expertise include several chronic and common skin conditions. He sees patients with psoriasis, seborrheic dermatitis, fungal skin infections, nail fungus, and warts, as well as melasma and other pigmentation concerns. A further part of his practice is the evaluation of pigmented lesions and skin tumors, including melanoma and other forms of skin cancer.

On the procedural and cosmetic side, Dr. Pinar's practice includes cryotherapy, which is used for selected skin lesions, as well as PRP, hair mesotherapy, and Plexr application. Hair loss treatment is one of his listed areas of expertise, and PRP and hair mesotherapy form part of the options he may discuss in that context.

INTERNATIONAL PATIENTS

Dr. Pinar consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the international patient team coordinates the collection of prior reports, such as laboratory and pathology results, earlier dermatology reports, operative notes, and discharge summaries, and arranges appointments and the hospital visit itself.
