CLINICAL FOCUS

Dr. Şeker's work centers on the maintenance and restoration of oral health. This includes the assessment of the teeth, gums and surrounding tissues, the identification of dental disease and the planning of appropriate treatment.

A further area of her practice is esthetic dentistry, which addresses the appearance of the teeth alongside their function. In this area, Dr. Şeker evaluates the patient's expectations together with the clinical findings and explains which options may be suitable and what each would involve.

INTERNATIONAL PATIENTS

Dr. Şeker consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the hospital's international patient team coordinates the collection of prior reports and imaging, such as X-rays, dental records, laboratory and pathology results, operative notes and discharge summaries,...
