HOSPITAL

Acibadem Atasehir
Hospital, İstanbul

DEPARTMENT

Gynecology & Obstetrics

CLINICAL FOCUS

A central part of Dr. Yılmaz's practice is urogynecology, which addresses disorders of the female pelvic floor and lower urinary tract. She evaluates and treats women with urinary incontinence and other bladder health concerns. Her work also covers the care of women during menopause, including the assessment and management of menopause-related symptoms.

Dr. Yılmaz additionally provides treatment of sexual dysfunction and treatment of endometriosis. In each of these areas, care begins with a careful assessment of the individual patient's symptoms and history, after which the available options are discussed so that a suitable approach can be agreed on together.

INTERNATIONAL PATIENTS

Dr. Yılmaz consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the international patient team coordinates the collection of prior medical reports and imaging, arranges appointments and organises the hospital visit.
