CLINICAL FOCUS

Dr. Öztürk's clinical practice is centered on prosthetic dental treatment and prosthodontics, the branch of dentistry concerned with restoring or replacing missing or damaged teeth. Her published clinical reports describe restorations such as implant-supported fixed partial dentures, telescopic overdentures and implant-retained overdentures, and she has studied the materials...

Within implant dentistry, her work has addressed implant-assisted restorations and impression techniques used in their fabrication. She also practices aesthetic dentistry, and her research interests include the color stability of restorative materials and the effect of ceramic thickness and firing on the color of all-ceramic restorations.
