DEPARTMENT
Nuclear Medicine

CLINICAL FOCUS

Dr. Topuz performs and interprets nuclear medicine imaging studies. Her areas of expertise include PET, SPECT and scintigraphy, as well as two specific scintigraphic examinations: brain scintigraphy and myocardial perfusion scintigraphy.

In addition to imaging, Dr. Topuz provides radioiodine treatment, a form of nuclear medicine therapy. Her research interests reflect her clinical work in oncologic imaging: her publications address 18F-FDG PET/CT parameters in patients with endometrial cancer and other tumors, and PSMA PET in patients with prostate cancer, including...
