CLINICAL FOCUS

A large part of Dr. Timurkaynak's work involves inflammatory skin diseases. He assesses and treats psoriasis, eczema, urticaria, rosacea, and acne, as well as lichen planus, lichen sclerosus, and skin involvement in lupus erythematosus.

His practice further includes melasma and other pigment disorders, skin infections and sexually transmitted infections, and mole monitoring with assessment of skin tumours. Cosmetic dermatology procedures form part of his work, and each application is considered in the context of the individual patient's skin condition and medical...
