CLINICAL FOCUS

Dr. Aydın's areas of expertise are medical pathology and clinical cytology. In medical pathology, tissue samples obtained through biopsy or surgery are processed and examined under the microscope to characterize disease, including the presence, type and extent of tumors or inflammatory changes.

Her published work reflects these interests. Titles include a study on atypical cervicovaginal smears in women with a history of intrauterine device use, a paper on the surgical approach to thyroid nodules with suspicious cytology, and case reports on papillary cystadenoma of the submandibular gland, carcinoid tumor of the common bile...
