CLINICAL FOCUS

Dr. Dicle evaluates and treats chronic inflammatory skin diseases, including psoriasis, urticaria, rosacea, atopic dermatitis, contact dermatitis and seborrheic dermatitis, as well as acne. A particular area of her work is hair loss treatment, including hair loss during pregnancy.

She also sees patients with infectious skin conditions such as genital herpes and genital and body warts, and assesses suspicious skin lesions, including malignant melanoma and other skin tumours. Treatment options are discussed individually after clinical examination.
