Hospital, İstanbul

DEPARTMENT
Gynecology & Obstetrics

CLINICAL FOCUS

In gynecology, Dr. Karaahmet sees patients with menstrual irregularities, polycystic ovary syndrome, HPV and sexually transmitted infections. A particular area of her work is endometriosis treatment, where the approach is chosen according to the patient's symptoms, findings and priorities.

In obstetrics, Dr. Karaahmet manages pregnancy and birth-related care, including epidural birth and cesarean delivery. She also assesses and treats ectopic pregnancy. Decisions about the mode of delivery and pain relief are made together with the patient, taking into account her medical history and the course of the pregnancy.

Epidural birth

Polycystic ovary syndrome
