DEPARTMENT
Gynecology & Obstetrics

CLINICAL FOCUS

A central part of Dr. Gürsoy's practice is urogynecology, which addresses pelvic floor and bladder concerns in women. She evaluates and treats urinary incontinence and other bladder health problems. Assessment generally begins with a detailed history of symptoms and their effect on daily life, followed by a clinical examination;

Dr. Gürsoy also provides menopause care, including the evaluation of symptoms and a discussion of possible management options, and she offers treatment of sexual dysfunction. These concerns are often connected with pelvic floor health and hormonal changes, so they are considered together with the patient's overall gynecological picture.
