DEPARTMENT
Gynecology & Obstetrics

CLINICAL FOCUS

Dr. Pata's clinical practice covers gynecology, obstetrics and perinatology, with particular attention to high-risk pregnancies. In obstetric care, this includes the follow-up of pregnancies complicated by maternal or fetal conditions, where the frequency of visits, ultrasound assessment and the timing and mode of delivery are planned...

In gynecology, she provides consultation and follow-up for a range of conditions affecting women's health. Each case is evaluated on the basis of the patient's history, examination findings and available test results, and the possible approaches, including their expected course and limitations, are discussed before any decision is made.
