CLINICAL FOCUS

A substantial part of Dr. Şahin's work concerns diseases of the retina. She evaluates and treats patients with retinal tears and retinal detachment, macular degeneration and other retinal diseases. Where surgery is considered appropriate, her practice includes vitrectomy, and she also performs laser eye applications.

Dr. Şahin also manages glaucoma and cataract, including intraocular lens procedures. Within her subspecialty of neuro-ophthalmology, she assesses visual problems that arise from disorders affecting the optic nerve and the visual pathways rather than the eye alone, which may require coordination with other specialties. Her listed areas of expertise further include colour blindness and ocular stem cell treatment.

Retinal Tears and Detachment

Macular Degeneration

Retinal Diseases

Laser Eye Applications

Vitrectomy

INTERNATIONAL PATIENTS

Dr. Şahin consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the...
