Acibadem Bursa Hospital

DEPARTMENT  
Nephrology Department

## CLINICAL FOCUS

Dr. Yörük evaluates and manages chronic kidney disease and acute kidney injury, as well as glomerulonephritis and diabetic kidney disease. Her work also includes hypertension management and the diagnosis and treatment of electrolyte disorders, which are frequently linked to underlying kidney conditions.

For patients whose kidney function has declined to the point where renal replacement therapy is needed, Dr. Yörük provides care in hemodialysis and peritoneal dialysis, including the assessment of which approach may be appropriate for an individual patient. She also provides kidney transplant follow-up, monitoring graft function and managing the medical issues that can arise after transplantation.

Chronic kidney disease Acute kidney injury Glomerulonephritis  
Diabetic kidney disease Hypertension management

## INTERNATIONAL PATIENTS

International patients coming to Dr. Yörük are supported by the Acibadem international patient team, which coordinates the collection of prior medical records before the visit. This may include laboratory and pathology results, imaging reports such as ultrasound, CT or MRI reports, dialysis records, operative notes and discharge summaries.
