CLINICAL FOCUS

Dr. Öztürk's practice covers head and neck surgery, including the evaluation and surgical treatment of head and neck cancers. In nasal and sinus surgery he performs septoplasty, rhinoplasty and septorhinoplasty, procedures that address nasal breathing, deviation of the septum and the external shape of the nose.

He also sees patients with sleep disorders, including sleep apnea and insomnia, and performs tonsillectomy when indicated. Treatment decisions are made individually after examination; not every patient is a candidate for surgery, and non-surgical options are discussed where appropriate.
