CLINICAL FOCUS

Dr. Karamık's work centers on oral and dental health. In a dental consultation she reviews the patient's history and current complaints, examines the teeth, gums and surrounding structures, and discusses the care options that are relevant to the individual situation. Where existing dental records or imaging are available, these are taken into account when forming a plan.

General information about restorative and cosmetic dental treatments is available on this site, including E-Max crowns, composite bonding, laminate veneers and full mouth reconstruction. Whether any particular approach is suitable for a given patient can only be determined after a clinical examination, and not every patient is a candidate for every procedure.

INTERNATIONAL PATIENTS

Dr. Karamık consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as dental X-rays, CT reports, laboratory results and notes on previous dental treatment, and arranges appointments and the hospital visit itself.

EDUCATION & TRAINING
