CLINICAL FOCUS

Dr. İşeri evaluates and treats patients with movement disorders and neurodegenerative diseases. This includes Parkinson's disease, Parkinson's plus syndromes and corticobasal degeneration, as well as Alzheimer's disease and cognitive deficits after COVID-19.

Her published work reflects these areas. She has co-authored reviews on Parkinson's plus syndromes and corticobasal degeneration and on current treatments for Alzheimer's disease (Türkiye Klinikleri, 2021), a study evaluating cognitive deficits in patients infected with COVID-19 (Eur Rev Med Pharmacol Sci, 2022), and a report on the...
