CLINICAL FOCUS

Dr. Dikmen evaluates and treats patients with headache disorders, with a particular interest in migraine. Her published work includes studies on onabotulinumtoxin A in patients with chronic migraine and on the relationships between migraine, depression, anxiety, stress, sleep disturbances and migraine-related disability.

In clinical neurophysiology she performs and interprets EEG and EMG studies. She has co-authored work on electromyography in the pediatric population, on expected and experienced pain during EMG, on motor unit firing characteristics in motor neuron diseases, on the diagnostic use of dermatomal somatosensory evoked potentials in spinal...
