CLINICAL FOCUS

Dr. Çetin's clinical focus spans medical, venereal, and aesthetic dermatology. In medical dermatology, he provides acne treatment and hair loss treatment, including hair loss that occurs during pregnancy, where the choice of treatment needs to take the pregnancy into account. He also treats excessive sweating and manages body warts and genital warts.

In aesthetic dermatology, Dr. Çetin performs botulinum toxin applications, fractional laser procedures, and non-surgical facial rejuvenation. As with any medical treatment, suitability for these procedures is assessed on an individual basis, and the expected course of treatment and possible side effects are discussed with the patient beforehand.

Hair loss treatment, including during pregnancy

Acne treatment

Excessive sweating treatment

Botulinum toxin applications

Fractional laser procedures

INTERNATIONAL PATIENTS

Dr. Çetin consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. For patients coming from abroad, the Acibadem international patient team coordinates the collection of prior reports and imaging, arranges appointments, and organizes the hospital visit.
