Hospital

DEPARTMENT

Orthopedics & Joint Center

CLINICAL FOCUS

A large part of Dr. Kurnaz's work concerns the hip and knee. He performs hip replacement surgery and knee replacement surgery for patients whose joint symptoms have not responded adequately to other measures.

He also treats conditions of the upper limb, including shoulder surgery and elbow surgery, with a research background in arthroscopic repair of shoulder tendon tears. His practice further includes foot and ankle surgery and orthopedic trauma care, such as the management of fractures.
