İstanbul

DEPARTMENT
Pulmonology

CLINICAL FOCUS

Dr. Baran evaluates and manages a range of respiratory conditions. These include asthma, bronchitis, pneumonia and other lower respiratory tract infections, pulmonary embolism, and other forms of lung disease such as chronic obstructive pulmonary disease and pulmonary fibrosis.

His practice also includes the evaluation of lung nodules and thoracic malignancies, including lung cancer, other thoracic cancers, and mesothelioma. He performs bronchoscopy and EBUS (endobronchial ultrasound) as diagnostic procedures where clinically indicated.
