CLINICAL FOCUS

Dr. Altınayak's work centers on three related areas:

As a laboratory physician, his role is to support the treating clinicians who order and interpret tests in the context of each patient's overall care. Laboratory results are one part of a broader clinical assessment, and their significance is determined together with the patient's history, examination findings and other investigations.

INTERNATIONAL PATIENTS

Dr. Altınayak works in Turkish and English, and interpreters can be arranged for patients who speak other languages. The Acibadem international patient team coordinates the collection of prior reports and imaging, including laboratory and pathology results, MRI, CT, X-ray or ultrasound reports, operative notes and discharge summaries, and arranges appointments and the hospital visit.
