Dental & Oral Health

CLINICAL FOCUS

The starting point of Dr. Bayrı's work is the orthodontic evaluation. This involves examining the position of the teeth, the relationship between the upper and lower jaws and the way the teeth meet when the mouth is closed. Where existing records are available, such as dental X-rays or notes from previous treatment, these are reviewed alongside the clinical findings.

Based on this assessment, Dr. Bayrı addresses dental alignment and bite correction. Dental alignment concerns the position and spacing of the teeth within each arch, while bite correction concerns how the upper and lower teeth fit together.

Orthodontic treatment planning

INTERNATIONAL PATIENTS

Dr. Bayrı consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as dental X-rays, CT images and records of previous dental or orthodontic treatment, and arranges appointments and the hospital visit.
