CLINICAL FOCUS

Dr. Mutlu's clinical work addresses conditions that require prompt evaluation in an emergency setting. A central area of his practice is trauma, covering the initial assessment and management of acute injuries. He also sees patients with insect bites and stings, including bee stings and tick bites, where early recognition of local and systemic reactions guides the next steps in care.

A further part of his practice involves environmental emergencies, including drowning, and breathing-related emergencies such as acute hypoxia and airway obstruction. In these situations the emergency assessment focuses on the patient's history, the circumstances of the event, a clinical examination and stabilization of breathing and circulation, followed by a discussion of what further evaluation or treatment may be...

Environmental emergencies

INTERNATIONAL PATIENTS

Dr. Mutlu consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. The international patient team coordinates the collection of prior reports and imaging, for example MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and organizes the hospital visit.
