CLINICAL FOCUS

Dr. Paydaş's areas of expertise include kidney diseases and kidney failure. She evaluates and follows patients with diabetic nephropathy, nephrotic syndrome and hydronephrosis. Because kidney conditions often develop alongside other medical problems, her background in internal medicine allows the kidney to be assessed in the context of the patient's overall health, including coexisting conditions and current medication.

For patients whose kidney function has declined to the point where replacement of kidney function is needed, her practice includes hemodialysis. Whether dialysis or another approach is appropriate depends on the individual patient's kidney function, the underlying cause, laboratory findings and general condition.

INTERNATIONAL PATIENTS

Dr. Paydaş speaks Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as ultrasound, CT or MRI reports, laboratory and pathology results, dialysis records, operative notes and discharge summaries, and arranges the appointment and...
