DEPARTMENT
Organ Transplantation

CLINICAL FOCUS

The core of Dr. Gülten's work is kidney transplantation and the coordination that surrounds it. Transplant coordination involves organizing the steps of the transplant pathway, from the evaluation of the recipient and the donor through preparation for surgery and the arrangements that follow the procedure.

His areas of expertise also include nephrology, which relates to the assessment and follow-up of patients with kidney disease who may be candidates for transplantation. In addition, Dr. Gülten has an interest in medical ethics and medical law, fields that are closely connected to organ and tissue transplantation, including questions of...
